

BioSophia America LLC (BioSophia) works with nonprofits, such as Friends of Disabled Adults and Children (FODAC), a 501(c)3 organization, to provide affordable disposition of their donations through eCommerce, repurpose, E-Waste and Lifecycle maintenance. This gives you a tax deduction for your donations and creates a revenue stream so the nonprofits can support their mission and individuals who are disabled, seniors, Veterans, or from disadvantaged communities. Our expertise and services are a vital resource within the nonprofit community. BioSophia maintains an evergreen policy of no landfill use and recycles technology and material that cannot be reused, refurbished or repurposed. BioSophia accepts E-Waste for their nonprofits consisting of computer equipment and selected electronics from individuals and companies.

### Why should you donate to recycle?

- Local nonprofit companies are formed under government grants, but recycling materials that cannot be refurbished or reused is a large part of their sustainability and a revenue stream to help people.
- Donating your electronic waste through BioSophia for a nonprofit like FODAC keeps the materials out of landfills but also keeps the organizations afloat and able to give back to the community.
- Any proceeds from recycled equipment go to the nonprofit like FODAC to help disabled individuals and their community.

### Why should you recycle with us?

- Tax Deduction for your donation that could be of great value to a company or individual
- 10 year knowledge of the Recycling Industry and End-of-Life Technology Recycling Program
- We coordinate the preparing, loading, and deliverables of donated equipment free of charge
- Member of the IERC (International Electronic Recovery Coalition)
- All donates are tax deductible through our non-profit partners, like FODAC
- We remove the hard drive from the PC or laptop and utilize Department of Defense (DoD) software to wipe the data off the drive, or we can destroy the drive through shredding
- We use EPA Certified Recycling partners that are ISO 9001 & 9014 compliant for recycling material for us after we have de-manufactured the material
- Certificate of Wiping or Destruction can be mailed to the client if they so choose (\$10 fee per hard drive to destroy by shredding)

### Who should I contact for a donation/pick-up?

- Bob Rust: Dispatch/Coordinator
